~~Please amend claim 6 as follows:~~

---6. A heat source locator comprising;

a housing;

a thermal detector mounted within said housing to detect a heat source generally along a field of view; and

a light emitting device mounted within said housing positioned to emit a beam of light having a wavelength outside the visible spectrum of a human and generally centered along said thermal detector field of view;

whereby an operator may locate a heat source by sensing the presence of the heat source through the thermal detector and then locating the position of the heat source by directing the light beam from the light emitting device while viewing such with a light viewing device adapted to view the emitted wavelength.---

Please cancel claims 7 and 8.

~~Claim 9, line 1 change "8" to "6"~~
